SUMMARY

Experienced software professional with 8+ years of full-stack development expertise. Specialized in Java/J2EE technologies, MVC architecture, and frameworks such as Spring, Struts, and Hibernate. Proficient in developing robust applications with Spring Boot, Spring MVC, and Spring Security. Skilled in frontend development using Angular 2, ReactJS, and Backbone.js.

Strong database management skills with SQL, PL/SQL, and experience across Oracle, MySQL, SQL Server, and DB2. Experienced in cloud services, particularly AWS, including EC2, S3, DynamoDB, and Lambda Functions.

Proficient in SOAP and RESTful web services implementation, Microservices architecture, and containerization with Docker and Kubernetes. Well-versed in test automation using Selenium, TestNG, JUnit, and CI/CD tools like Jenkins and Maven.

Familiar with Agile SCRUM methodology, adept at communication, and collaboration in both onshore and offshore environments. Proven track record of delivering high-quality solutions while meeting project deadlines.

Leveraged Generative AI technologies such as GitHub Copilot and Claude Gemini enhance development processes and improve code quality.

Generative AI Technologies: Hands-on experience with LangChain, LangGraph, RAG (Retrieval-Augmented Generation), Agentic Workflows, n8n, A2A automation workflows, and MCP servers.

WORK EXPERIENCE:

Publicis Sapient

May 2024 To Present

Description: Project Title: CNS Micro Frontend Application and Backend Integration with Java Spring Boot

Client- OPTUM

Roles and Responsibilities:

- Developed and maintained responsive web pages using React, ensuring optimal performance and user experience.
- Created and integrated GraphQL APIs to enhance data fetching efficiency and flexibility.
- Worked extensively with Adobe Content Manager to manage and deliver digital content effectively.
- Leveraged Generative AI technologies to innovate and optimize web development processes, improving overall project outcomes.

Walmart Global Tech India • Bengaluru, Karnataka
2024

March 2022 To May

HARSHIT GUPTA

Technical Lead | Senior Software Engineer

LinkedIn: <https://www.linkedin.com/in/harshit-gupta-459715104/>

Description: Project Title: Mission Control Internal micro frontend application responsible for maintaining data across various systems.

Roles and Responsibilities:

- Developed multiple custom React components as part of a micro frontend project
- Took ownership of several end-to-end feature designs and implementations within the project
- Contributed to various modules, including order management services, ensuring comprehensive coverage across different aspects of the application
- Demonstrated proficiency in React development, leveraging custom components to enhance the user experience and streamline functionality
- Collaborated with team members to integrate components seamlessly into the broader application architecture
- Actively participated in code reviews, ensuring high code quality and adherence to best practices
- Engaged in continuous learning and improvement, staying updated with the latest developments in React and frontend technologies
- Played a key role in ensuring the scalability and maintainability of the frontend codebase, optimizing performance where necessary
- Effectively communicated with stakeholders to gather requirements, provide updates on progress, and address any concerns or feedback

Skills/Domain: HTML5, CSS3, Material UI, ReactJs, Router, Redux(toolKit), Api integration, Unit Testing, GIT, Java, SQL, Microservices, Spring-Reactive, Spring-Security, Spring-Cloud.

HCL Technologies, TECHNICAL LEAD

- Led the development of a cartonization product for Walmart, optimizing packaging efficiency
- Developed a user-friendly React interface and designed an efficient packing algorithm
- Collaborated with stakeholders to refine the algorithm, conducted rigorous testing, and integrated it seamlessly into the application
- Implemented intuitive user interfaces and gathered feedback for continuous improvement
- Documented the algorithm for future maintenance and onboarding

Skills/Domain: HTML5, CSS3, Java, SQL, Microservices, Spring-Reactive, Spring-Security, Spring-Cloud.

6D Technologies, Senior Software Engineer

Description: Project Title: Service Order Management is responsible for maintaining service orders received from various third-party systems.

Roles and Responsibilities:

- Developed Java/J2EE applications incorporating Java 8 features like Streams and Lambda Expressions
- Designed backend logic using Core Java 8, including Collections and multi-threading
- Utilized Spring Modules for application development and PostgreSQL/PostGIS for database schema
- Developed RESTful APIs in Spring Boot 2, tested using SOAP UI Advanced, Postman, and Swagger
- Deployed applications on AWS stack for high availability
- Implemented continuous integration using Jenkins and managed projects using Jira in Agile environments
- Integrated applications into SOA architecture using WebSphere Message Broker and ILog

Skills/Domain: Java, SQL, Microservices, Spring-Reactive, Spring-Security, Spring-Cloud.

Ericsson Global Services Software Engineer / Software Development

Description: Project Title: Revenue Manager

- Developed and maintained distributed Java 8 applications using Spring MVC and Hibernate
- Implemented functionalities using Spring Boot, Thyme leaf, and Hibernate ORM
- Built microservices with Spring Boot for Restful APIs
- Utilized Spring Data Rest for MongoDB retrieval
- Implemented Hibernate Criteria for SQL database transactions
- Explored Quarkus's reactive features and Micronaut's HTTP server
- Developed JUnit 5 test cases and used Git/GitHub for version control
- Designed applications using OO and OOP design patterns like factory, specification, and Event Sourcing

Testing: Conducted comprehensive unit testing to ensure application reliability and performance.

Version Control: Maintained codebase using GIT, facilitating team collaboration and code versioning.

Skills/Domain: Java8, Postman, Git

EDUCATION:

Bachelor of Engineering, ECE: Jaypee university of engineering and technology, 2017
